SUMMARY

Passionate problem solver and programmer with a dedication to writing clean, efficient code. Proficient in data structures, algorithms, and full-stack development. Seeking a challenging software engineering role to contribute to professional growth and drive innovation within a dynamic organization.

EDUCATION

B.Tech in Electronics and
Telecommunications Engineering

Indira Gandhi Institute of Technology

📅 09/2017 - 07/2021 📍 Dhenkanal,Odisha

CGPA

7.39 / 10.0

EXPERIENCE

Junior Backend Developer

AuctionSoftware.com

📅 04/2023 - Present 📍 Chennai,India

- Developed and maintained web applications using Node.js and Express.js to ensure high-performance, secure, and scalable software solutions.
- Utilized HTML, CSS, and jQuery to create responsive and user-friendly front-end interfaces, enhancing the overall user experience.
- Collaborated with the team to design, implement, and maintain MySQL databases, including schema design, data modeling, and query optimization, to support application functionality.
- Designed and implemented RESTful APIs to facilitate seamless communication between the front-end and back-end systems. Implemented authentication and authorization mechanisms to ensure secure access to sensitive data and features.
- Diagnosed and resolved complex technical issues, contributing to the application's stability and performance improvement. Stayed up-to-date with industry trends and best practices to continuously enhance technical skills and contribute to the team's growth.
- Currently working on 'ECX,' an auction-based software allowing users to bid on a wide range of products.

PROJECTS

My-Portfolio Application

📅 09/2023 - 09/2023

🔗 <https://lalatendu65.github.io/Myportfolios>

Crafted a personalized portfolio application using React.js and CSS, highlighting my skills and projects in a visually appealing and interactive format

- Developed a personalized portfolio application using React.js, showcasing skills, projects, and professional achievements with an emphasis on user experience.
- Designed an interactive and visually appealing user interface to showcase skills and projects.
- Included project details, skills, and contact information for a comprehensive overview.
- Ensured seamless navigation and a user-friendly experience to effectively convey professional information.

EXPERIENCE

Software Developer Trainee

Publicis Sapient

📅 04/2022 - 10/2022 📍 Bengaluru, India

- Completed comprehensive training in the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Gained hands-on experience in building modern web applications using cutting-edge technologies. Developed and deployed web applications, utilizing the following technologies.
- React.js for building dynamic and interactive user interfaces. MongoDB for efficient and scalable data storage. Node.js and Express.js for server-side development and RESTful API creation.
- Worked on real-world projects, applying knowledge of the MERN stack to create full-stack web solutions.
- Collaborated with senior developers and mentors to enhance software development skills and best practices.
- Acquired proficiency in creating responsive and user-friendly web applications to improve the user experience.

TRAINING / COURSES

Full stack web developer

PROJECTS

CRUD Application

📅 10/2023

🔗 <https://lalatendu65.github.io/ReactCurd/>

Built a dynamic CRUD application using Node.js, React, and MongoDB, showcasing proficiency in full-stack development and effective data management

- I developed a robust CRUD (Create, Read, Update, Delete) application leveraging a tech stack comprising Node.js, React, JSS for styling, and MongoDB for database management.
- This project showcases my proficiency in building full-stack applications, enabling seamless user interactions through React components, efficient data handling with Node.js server, and secure data storage and retrieval using MongoDB.

Real-Estate-Management App

📅 11/2022

🔗 <https://github.com/lalatendu65/Real-Estate-Project/tree/main>

Developed a Real Estate Management application using React, Node.js, and MongoDB, streamlining property management with a dynamic and responsive interface.

- Created a Real Estate Management application using React, Node.js, and MongoDB.
- Implemented dynamic and responsive features for seamless property administration.
- Ensured efficient data handling and storage, enhancing overall system performance.
